

ADVANCED EMAIL PHISHING

Prepare your human firewall for phishing attacks

Your employees are your “human firewall” and are targeted first in cyber-attacks. We will test to see how your employees perform against real business email compromise tactics.

We Test Your Employees on:

1. **Download** dangerous files that execute malware and ransomware.
2. **Click on links** to dangerous sites with malicious executables.
3. **Provide login credentials** to systems that house your systems and data.

What You Get:

We will regularly test your employees and provide the training and tools they need to identify and avoid these and other advanced email phishing attacks.

Let us test your
employees!

Call 800-214-2107 or email
Contact@OnDefend.com
to get started.
