

INCIDENT RESPONSE READINESS

Prove that your organization can respond to a cyber breach

We will verify that your company can respond to and recover from a successful cyber-attack.

What We Do:

1. **Review** your current Incident Response Plan to make sure it matches your technology, stakeholders and overall environment.
2. **Proving** the plan will work by simulating events with tabletop exercises.
3. **Updating** your plan so you can be confident it will work in real-time.

If you do not have an incident response plan, don't worry, we can build one for you.

What You Get:

Comprehensive Report & an Updated Plan to ensure your organization can respond to an attack

Let us get your
response plan
ready for action!
