

CLOUD SECURITY SERVICES

Prove your cloud environment is secure

We provide the security cloud services your organization needs to know that your environment, systems, and data are secure.

Our Cloud Services Include:

1. **Cloud Security Assessment** – We identify threats caused by misconfigurations, unwarranted access, non-standard deployments and other vulnerabilities.
2. **Cloud Penetration Assessment** – We use the latest in tactics, techniques, and procedures (TTPs) to perform both unauthenticated and authenticated security testing of your cloud environment.
3. **Cloud Migration Consulting** – We will help you migrate some of the physical servers or your entire data center to the cloud allowing you to maintain cloud data ownership, control, security, and visibility.

What You Get:

Comprehensive Report & Recommendations for ongoing strategies!

Let us test
improve your
cloud security!
