

Consulting Services

Trusted guidance in building a resilient security program

OnDefend goes beyond testing to help you build, measure, and mature a resilient security program. This means aligning strategy, governance, and compliance to reduce risk and prepare your organization for what comes next.

Our Consulting Services Include:

Compliance Readiness

We assess compliance readiness by identifying gaps, aligning controls to regulatory requirements, and preparing organizations to confidently pass audits.

Risk Assessments

We evaluate security controls, governance, and operational readiness to deliver a prioritized roadmap for reducing risk and strengthening your security posture.

Risk, Governance & Compliance

We help organizations build structured, governed, and resilient security programs aligned to measurable risk reduction and applicable standards.

AI Deployment & Controls

We assess AI systems, guardrails, governance, and privacy controls to identify AI-specific risks and support secure, responsible adoption.

Post-Quantum Readiness

We assess cryptographic exposure, identify quantum-related risks, and provide a prioritized roadmap for transitioning to quantum-resistant security.

Security Program Maturity Assessments

We evaluate cybersecurity program maturity, benchmark capabilities against leading frameworks, and deliver a roadmap for measurable security improvement.

Tabletop Exercises

We conduct realistic, scenario-driven exercises that test how executives, technical teams, and partners coordinate and respond during cyber incidents.

Virtual CISO (vCISO)

We provide on-demand executive cybersecurity leadership, delivering strategic direction, risk oversight, and compliance guidance without the cost of a full-time CISO.

The OnDefend Difference

We uncover the hidden risks traditional testing misses by combining our elite cyber operators with proprietary innovations and AI-driven intelligence to continuously reduce your security exposure.
